

Manar Harby Abd Elmoneam

Junior Data Analysis

(+2)01157265696 | [Gmail](#) | Giza, Egypt | [LinkedIn](#) | [Github](#)

Junior Data Analyst and Excellent grade accounting graduate with a solid foundation in financial operations and data management. Recently completed intensive technical training in the "Digital Pioneers" (Digilians) program, gaining proficiency in Python, SQL, and Machine Learning. Expert in advanced Excel, Power BI, and Statistics, with a proven track record of transforming raw data into actionable insights

Experience

Junior Data Analyst | Digital Pioneers Initiative (Digilians) Ministry of Communications & Egyptian Military Academy | (Dec 2025 – Present)

- Developed advanced data models and performed statistical analysis using Python and SQL to derive actionable insights for business problems.
- Applied Machine Learning algorithms and Data Mining techniques to identify patterns and trends within large datasets.
- Utilized SPSS and Excel for comprehensive statistical reporting and data visualization to support executive decision-making processes.
- Automated data processing tasks using AI tools, improving analytical accuracy and reducing manual workload.
- Collaborated in a professional environment emphasizing leadership and business English to present findings effectively to stakeholders.

Billing Executive | Hellmann Worldwide Logistics | (Sep 2024 – Aug 2025)

- Managed billing for sea freight imports, ensuring 100% accuracy in invoicing and timely submissions to clients.
- Coordinated directly with international suppliers and customs authorities to ensure seamless operations and full regulatory compliance.
- Maintained precise financial records by verifying shipping documentation against billing data to eliminate discrepancies.

General Accountant | Egypt Luxury Company | (Oct 2023 – Sep 2024)

- Maintained detailed financial records and reporting, focusing on precision in transaction entries and account balancing.
- Monitored customer and supplier accounts to maintain healthy cash flow and financial reconciliation.
- Managed treasury accounts and prepared daily financial entries to ensure accurate liquidity tracking.

Food & Beverage Administrator | Pyramids Park Resort | (Oct 2022 –Oct 2023)

- Facilitated seamless communication across various hotel departments to ensure operational synergy
- Optimized the Director's professional calendar by managing appointments and coordinating high-level meetings.
- Drafted and managed official reports, formal letters, and internal forms to maintain accurate documentation.

Education

Bachelor of Commerce, Major in Accounting and Auditing | Ain Shams University | Grade: Excellent | **2022**

Projects

SignSpeak AI – Arabic Sign Language Recognition | Tools: Python, MediaPipe, TensorFlow/Keras, GRU, BiGRU, BiLSTM

- Developed an AI-based Arabic Sign Language recognition system using MediaPipe landmark extraction, generating normalized 80-frame sequences with 153 features from sign-language videos.
- Preprocessed and quality-checked the video sequences, applying consistent landmark normalization and training-only data augmentation to improve model robustness while preventing data leakage.
- Trained and compared GRU, BiGRU, and BiLSTM sequence-classification models using cross-validation and comprehensive evaluation metrics, including Accuracy, Balanced Accuracy, Precision, Recall, and F1-score.

NeuroScan AI | Deep Learning & Computer Vision | Tools: Python, TensorFlow, Keras, ResNet50, MobileNetV2, OpenCV, Scikit-learn

- Developed a deep learning pipeline to classify brain MRI images into 4 classes using transfer learning with pretrained ResNet50 and MobileNetV2 architectures.
- Preprocessed and standardized MRI images to 224×224, applied data augmentation, and optimized the TensorFlow data pipeline using caching and prefetching.
- Performed model fine-tuning by unfreezing selected convolutional layers and applying a lower learning rate to improve classification performance.
- Evaluated models using accuracy, precision, recall, F1-score, and confusion matrix, achieving 92.56% test

accuracy with ResNet50 and a 0.92 weighted F1-score.

Warehouse Management & Logistics Dashboard | Tools: Power BI, Power Query, DAX

- Built an end-to-end Power BI dashboard to improve visibility into warehouse operations, stockouts, and layout efficiency across 30 warehouses.
- Analyzed 13K stockout units and regional layout efficiency, identifying an overall average efficiency of 50.41% across North, South, and West regions.
- Visualized key business metrics including \$160M total revenue and \$33M total profit to support data-driven operational decisions.
- Analyzed order fulfillment, fulfillment days, and temperature-controlled storage, identifying the North region as the top performer and warehouses requiring layout optimization.

Body Performance Classification & Prediction | Tools: (Pandas, Numpy, Scikit-Learn), ML Algorithms.

- Developed an end-to-end Machine Learning pipeline to classify physical performance into 4 grades (A, B, C, D) using demographic and biometric data from 13.4K individuals.
- Performed data preprocessing and Exploratory Data Analysis (EDA), analyzing feature relationships and correlations including systolic and diastolic blood pressure.
- Trained and evaluated multiple classification models, including Random Forest, Gradient Boosting, and XGBoost, with hyperparameter optimization.
- Achieved a peak validation accuracy of 74.14% using Gradient Boosting and identified age and body fat percentage as the most influential predictive features.

Technical & professional Skills

- **Data Analysis & Visualization:** Advanced Excel, Power BI, Power Query, DAX, SPSS, Data Visualization
- **Programming & Databases:** Python (Pandas, NumPy, Scikit-learn), SQL (MS SQL Server), Data Modeling
- **Machine Learning & Analytics:** Machine Learning, Deep Learning, Statistics, EDA, Predictive Modeling.
- **Soft Skills:** Analytical Thinking, Problem Solving, Leadership, Business English
- **Languages:** Arabic (Native), English (Very Good).

Certifications & Courses

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300) – (2026)**
- **Python Programming Basics:** Information Technology Institute - ITI (2026).
- **Google Data Analytics Professional Certificate:** Coursera (2026).
- **Delivering Quality Work with Agility:** IBM (2026).
- **Database Fundamentals:** Information Technology Institute - ITI (2026).
- **Introduction to Modern AI:** Cisco Networking (2025).
- **Data Analysis Specialization:** IMP (2023)
